I'm taking private lessons at this school (advanced business Mandarin). **Cai Ying is my teacher and she has been phenomenal so far.** Lesson materials are tailored and exactly on point for my learning purposes (i.e. discussing/ negotiating with suppliers in mainland China). Previously introduced vocabulary is creatively blended into the next lessons so that you don't lose what you've learnt previously. The material is just right for my level: not too easy, yet still challenging enough. Having said that, it takes two to tango: the more time you put into learning Chinese outside the classroom, the more you will get out of it during your lessons. The school also organises interesting workshops/ seminars regularly that students can attend free of charge. Would highly recommend Mandarin Time and Cai Ying as a teacher anytime without hesitation.
